1. What is Headlines?

Duke's Bank is a demonstration ControlTier project that uses the elements library to automate the build and deployment of a 2-tier java-based sample application (JBoss and HSQLDB) called Duke's Bank. The build portion is automated using Cruise Control and Ant.

2. Get the Duke's Bank Demo Project

The Duke's Bank Demo Project comes as a standard part of the Elements Automation Library. Within the Elements documentation you'll find instructions for downloading, configuring, and running the Duke's Bank Demo.

Latest version of Elements is: 3.2
