1. What is the ATG Solution Library?

ATG Library is a pre-built set of automation modules and best practices that provide you with automated management of ATG application build and deployment processes, ATG platforms, and their related technologies. The main processes automated by this library are:

1. Code Build and Deployment
2. Data (or Content) Deployment

2. Download the ATG Solution Library

Latest version of ATG Solution Library is: 1.3

You can get the ATG Solution Library from the [ModuleForge download site](#) (hosted by SourceForge.net)

3. ATG Solution Library Documentation

[ATG Solution Library v1.3 Docs](#) (opens in new window)
