1. Overview

This section provides a reference for how to enhance the Headlines release management system. It is intended for developers interested in evolving the model and or automation modules.

2. Working with Types

You can create, edit, and delete Types using the Type Editor in Workbench. Please refer to the Type [documentation](#) for further information.

3. Working with Updaters

To learn more on how to work with Updaters, refer to the Updater [documentation](#).

4. Working with Service

To learn more on how to work with the Base Type Service, refer to the Service [documentation](#).
